

Meet Dennis White

Dennis White founded Spectrum 4 in 1987 to provide to the marketplace a new level of innovative exhibitry for the tradeshow, museum, retail, and visitor center markets. Since then the innovation has paid off with many accolades for design innovation and development.

Dennis White's experience spans a career of more than 35 years as a practicing Industrial Designer and innovator. He developed the first one year warranty program for interactive electronics, the EXHIBITRONICS system used in large scale interactive environments and created the interactive intelligent experience, designed lighter yet stronger custom display components and created operations formulas based on load management technology. These innovations continue to position Spectrum 4 on the leading edge of technology. The historical timeline of Spectrum 4's success' can be traced from the early 70's when Dennis' style was highly influenced by the Art Center College of Design philosophy. As far back as the early 70's Dennis' design abilities found favor with Jacque Cousteau, of the Living Sea Corporation while project managing exhibitry for several of the exhibit venues on the Queen Mary Museum in Long Beach California. Additional high end exhibit design projects followed with companies such as Mazda, Hewlett Packard, Weyerhauser, Standard Oil, Dunlop, Intel and others. This early on experience has proved invaluable as Spectrum 4, seeks to stay on the leading edge of design and technology as we serve our growing list of clientel and look for opportunities to serve the needs of others.

For more information about Spectrum 4 take a look at www.spectrum4.com

For more information on our value-added Green Technology solutions click on www.freshairliving.com/denniswhite and enter your name and then enter the password guest like "be my guest" and discover an innovative technology. I've used these products in successfully eliminating bad air in public

spaces. Be my guest and see for yourself and let me know if I can help.

Interests:

Dennis owns and tours a restored original 1932 Chevy Convertible and has an avid interest in classic cars. He's currently restoring and renovating an 1850's home in historic Roswell Ga. He enjoys fly fishing, and deep sea fishing. Dennis is a recreational slalom water skier. Dennis enjoys all aspects of the arts. He enjoys playing music, painting and sculpture.

Family:

Dennis is married to Kathleen for 34 years and has two daughters and an 18year old Bichon who acts like a 7 year old. Hard to believe but it's true.

Education:

Dennis graduated from San Jose State University with a degree in Industrial Design with graduate studies at The Art Center College of Design in L.A.
